

Gartner Sessions: Data and Analytics @ Lisbon

March 5th 2020

Agenda

15:00 The Future of Data and Analytics Is Cloud

The use of more than one cloud for Data and Analytics is inevitable. Data and analytics leaders must prepare for a Multi-cloud and Inter-cloud world, where data management, governance and integration become more complex than ever before.

In this session you will learn:

1. Why cloud? And why now?
1. What are the key D&A challenges for organizations transitioning to cloud?
1. What are the best practices for efficiently operating D&A in the cloud?

16:00 Top Technology Trends in Data and Analytics That Will Change Your Business

These D&A strategic Technology trends will have a significant impact over the next three to five years. Data and Analytics Leaders should educate and engage stakeholders for strategic and tactical planning.

1. An introduction to the trend with a Strategic Planning Assumption;
1. An explanation on the trend;

Gartner Speaker Profile

Donald Feinberg

Gartner Distinguished VP Analyst

Biography

Donald Feinberg is a Vice President and Distinguished Analyst in the Gartner ITL Data and Analytics group. Mr. Feinberg is responsible for Gartner's research on database management systems and data warehousing infrastructure and big data.

Before his current role, Mr. Feinberg held various management jobs within Gartner, most recently VP and General Manager of Latin American operations. He began his career at Gartner in the Software Management Strategies group responsible for DBMS software and vendors.

Prior to joining Gartner, Mr. Feinberg worked at Oracle, where he was Director of Technical Marketing for the company's IBM mainframe database business. In this capacity, he was responsible for technical sales and marketing support of the products worldwide. Previously, he was an Assistant Professor of Mathematics at Boston University. Mr. Feinberg resides in São Paulo, Brazil.
